

369B1842G5005

Nexus OnCore MAO50 8-Channel Analog Output Module

Product identification

General Electric 369B1842G5005 is the Nexus OnCore MAO50 8-Channel Analog Output Module for Nexus OnCore. It identifies the official catalogue configuration associated with the MAO50 analog-output module.

Parameter	Official value
Manufacturer	General Electric
Model	369B1842G5005
Product Family	Nexus OnCore
Product Type	Nexus OnCore MAO50 8-Channel Analog Output Module

Technical information

Parameter	Official value
Associated Model	MAO50
Output Type	mA/V analog output
Channels	8
Supply	24 VDC
Maximum Power	6.55 W
Output Capability	Most channels provide 4-20 mA; some can be configured for 1-5 VDC
Ambient Range	-20 to +50 degrees C on the certified module nameplate
Installation	Panel-mounted in a suitable enclosure
Catalogue Number	369B1842G5005

Applications

- Specifies an MAO50 analog-output module for a Nexus OnCore system.
- Drives multichannel current or supported voltage commands to field devices.
- Provides an exact catalogue reference for analog-output spare identification.

Analog Outputs

- Official documentation specifies associated model as MAO50 for this configuration.
- Official documentation specifies output type as mA/V analog output for this configuration.
- Official documentation specifies channels as 8 for this configuration.

Output Capability

- Official documentation specifies supply as 24 VDC for this configuration.
- Official documentation specifies maximum power as 6.55 W for this configuration.
- Official documentation specifies output capability as Most channels provide 4-20 mA; some can be configured for 1-5 VDC for this configuration.

Spare Identification

- Official documentation specifies ambient range as -20 to +50 degrees C on the certified module nameplate for this configuration.
- Official documentation specifies installation as Panel-mounted in a suitable enclosure for this configuration.
- Official documentation specifies catalogue number as 369B1842G5005 for this configuration.

Selection and installation checks

- Verify both the catalogue and mao50 nameplate identities.
- Confirm current or voltage output configuration.
- Match field loads and panel wiring.
