Ovation I/O Bus Terminator Assembly with Internal Guides

Product identification

Emerson 1B30023H01 is the Ovation I/O Bus Terminator Assembly with Internal Guides for Ovation I/O. It terminates the I/O bus in the matching Ovation hardware arrangement.

Parameter	Official value
Manufacturer	Emerson
Model	1B30023H01
Product Family	Ovation I/O
Product Type	Ovation I/O Bus Terminator Assembly with Internal Guides

Technical information

Parameter	Official value
Hardware Role	I/O bus terminator
Guide Type	Internal guides
Assembly Type	Terminator assembly
System Family	Ovation
Parts Program	Emerson factory-certified spare part
Quality Scope	Designed, manufactured, installed, and tested under Emerson procedures
Ordering Code	1B30023H01
Replacement Goal	Maintain control-system integrity
Service Purpose	Reduce maintenance downtime

Applications

- Terminates the I/O bus in the matching Ovation cabinet hardware.
- Replaces an installed terminator assembly that uses internal guides.
- Supports planned maintenance with a factory-certified Ovation spare.

Bus Termination

- Official documentation specifies hardware role as I/O bus terminator for this configuration.
- Official documentation specifies guide type as Internal guides for this configuration.
- Official documentation specifies assembly type as Terminator assembly for this configuration.

Parts Assurance

- Official documentation specifies system family as Ovation for this configuration.
- Official documentation specifies parts program as Emerson factory-certified spare part for this configuration.
- Official documentation specifies quality scope as Designed, manufactured, installed, and tested under Emerson procedures for this configuration.

Maintenance Controls

- Official documentation specifies ordering code as 1B30023H01 for this configuration.
- Official documentation specifies replacement goal as Maintain control-system integrity for this configuration.
- Official documentation specifies service purpose as Reduce maintenance downtime for this configuration.

Selection and installation checks

- Confirm the internal-guide mechanical arrangement.
- Retain the complete h01 ordering suffix.
- De-energize and document the i/o assembly before replacement.
