

369B1841G5006

Nexus OnCore MAI50 16-Channel Analog Input Module

Product identification

General Electric 369B1841G5006 is the Nexus OnCore MAI50 16-Channel Analog Input Module for Nexus OnCore. It identifies the official catalogue configuration associated with the MAI50 mA/V analog-input module.

Parameter	Official value
Manufacturer	General Electric
Model	369B1841G5006
Product Family	Nexus OnCore
Product Type	Nexus OnCore MAI50 16-Channel Analog Input Module

Technical information

Parameter	Official value
Associated Model	MAI50
Input Type	mA/V analog input
Channels	16
Supply	24 VDC
Maximum Power	11.0 W
I/O Function	Analog data acquisition
Ambient Range	-20 to +50 degrees C on the certified module nameplate
Installation	Panel-mounted in a suitable enclosure
Catalogue Number	369B1841G5006

Applications

- Specifies an MAI50 analog-input module for a Nexus OnCore system.
- Acquires sixteen current or voltage field signals through the associated hardware.
- Provides an exact catalogue reference for analog-input spare identification.

Analog Inputs

- Official documentation specifies associated model as MAI50 for this configuration.
- Official documentation specifies input type as mA/V analog input for this configuration.
- Official documentation specifies channels as 16 for this configuration.

Input Configuration

- Official documentation specifies supply as 24 VDC for this configuration.
- Official documentation specifies maximum power as 11.0 W for this configuration.
- Official documentation specifies i/o function as Analog data acquisition for this configuration.

Spare Identification

- Official documentation specifies ambient range as -20 to +50 degrees C on the certified module nameplate for this configuration.
- Official documentation specifies installation as Panel-mounted in a suitable enclosure for this configuration.
- Official documentation specifies catalogue number as 369B1841G5006 for this configuration.

Selection and installation checks

- Verify both the catalogue and mai50 nameplate identities.
- Confirm current or voltage input configuration.
- Match field wiring and enclosure requirements.
