

DS200SBCBG1ADC

Signal Buffer and Isolation Board

Product scope

- Exact GE board marking: DS200SBCBG1ADC.
- Legacy SPEEDTRONIC Mark V printed-circuit assembly.
- Mark V is no longer produced according to GE Vernova.
- Replacement requires project records and exact hardware comparison.

Manufacturer source

GE Vernova SPEEDTRONIC Mark V platform documentation

The exact model is verified from the supplied GE-marked hardware; public GE sources establish only the Mark V platform and lifecycle boundaries.
