**Description**

Triconex 4000103-510 is a 10 ft interface cable assembly listed in Tricon and Trident technical product guides for supported external termination assemblies.

The published cross-reference associates this cable with multiple compatible external termination assembly kits and specifically lists it in the 9764-510 RTD/TC/AI termination panel kit for Trident Model 2352.

**Applications**

- 4-20 mA analog signal interfacing through the 9764-510 termination kit
- RTD temperature input interfacing through the 9764-510 termination kit
- Thermocouple temperature input interfacing through the 9764-510 termination kit

**Technical note**

Triconex 4000103-510 is a 10 ft interface cable; select it by exact termination assembly and module documentation, then verify continuity, shielding, routing and loop operation.

**Evidence boundary**

The manufacturer technical product guides identify 4000103-510 as a 10 ft interface cable. No exact-model connector electrical rating was found in the public pages checked.
