

ET 200S Interface Modules IM 151-7 CPU

Edition 11/2003

This product information contains important information about the documentation mentioned above. It is to be regarded as a separate component. Its specifications and information have a higher binding nature than those of other manuals, instruction lists and Getting Starteds.

New IM 151-7 CPU with larger working memory

The IM 151-7 CPU working memory has been extended. The IM 151-7 CPU can execute larger user programs.

Due to these improvements, the order number of the IM 151-7 CPU was changed.

The new IM 151-7 CPU is:

- contained in the STEP7 V5.4 Service Pack 1
- configurable with the older STEP7 versions:

The IM 151-7 CPU with the new order number can be downloaded from the Internet as a hardware support package (0107) with STEP7.

Requirement is STEP7 V5.2, Service Pack1.

- compatible and configurable with the previous IM 151-7 CPU
