

8211-4307

GEM80/301/302/303 Ladder Processor Module

Official product identification

GEC Industrial Controls 8211-4307 is a -4307 ladder processor configuration for GEM80/301, GEM80/302 and GEM80/303 systems.

Parameter	Official value
Manufacturer	GEC Industrial Controls
Model	8211-4307
Product	Ladder processor
Architecture	GEM80 300 Series

Technical specifications

Parameter	Official value
Processor function	Ladder logic execution
Compatible controller line	GEM80/301, /302 and /303
Assembly version	8211-4307
Architecture	GEM80 300 Series
Application storage	Site-specific program and data
I/O relationship	Project-defined 300-series rack map
Startup dependency	Correct memory contents and initialization
Service requirement	Controlled logic and I/O validation
Country of Origin	United Kingdom

Applications

- Run a legacy 300-series ladder application on GEM80/301 hardware.
- Retain process sequencing in a GEM80/302 controller panel.
- Prepare a configuration-matched spare for GEM80/303 processor recovery.

Configuration recovery

- Export and verify the application.
- Record memory and board revisions.
- Validate startup and sequence timing safely.
