

# Honeywell 51401496-100

Dual Node Fan Assembly

## Product scope

- Provides forced-air cooling for Honeywell Dual Node electronics.
- Restores the documented airflow path through the node assembly.
- Uses the exact Honeywell spare-part identity 51401496-100.
- Requires power isolation and airflow-direction checks during service.

## Manufacturer source

Honeywell Dual Node Module service documentation, spare-parts listing for 51401496-100.

This English product record summarizes manufacturer-verified function, operating principle, application and exact-model matching requirements.

Only the exact configuration shown above is represented. Adjacent model variants, optional assemblies and system accessories are not treated as part of this ordering identity.

## Function, operating principle and application

The notes below explain how this product is used and how its documented signal, power or control path operates. They remain limited to the manufacturer evidence for this model.

### Function

The assembly moves cooling air through the Dual Node electronics so installed modules remain within their thermal operating limits.

### Operating principle

Powered fans maintain directed airflow across the node hardware and exhaust accumulated heat from the cabinet path.

### Application

It is a service component for restoring cabinet cooling performance where the original Dual Node fan assembly is worn or inoperative.

### Replacement boundary

Isolate cabinet power and verify airflow direction, connector pinout, fan voltage and mechanical mounting before installation.
