

Siemens 6DS1211-8AA

TELEPERM Bus Converter Power Supply Module

Product scope

- Supplies the UI bus converter's internal electronics.
- Belongs to the documented 6DS4400-8AB parent assembly.
- Supports legacy TELEPERM communication hardware.
- Requires supply and connector-position verification.

Manufacturer source

Siemens TELEPERM manufacturer documentation and official product record.

This English product record summarizes manufacturer-verified function, operating principle, application and exact-model matching requirements.

Siemens 6DS1211-8AA

TELEPERM Bus Converter Power Supply Module

Manufacturer-source product record

This record consolidates exact-model facts from the manufacturer references listed below. It is included to identify the ordering configuration before the retained source pages.

Parent assembly	UI bus converter 6DS4400-8AB
Module role	Power-supply section
Manufacturer status wording	Spare part
Document issue date	2018-10-17
Control-system context	Siemens UI bus-converter hardware

Official references

- Siemens TELEPERM manufacturer documentation and official product record.
- Manufacturer data sheet identifies 6DS1211-8AA as the power-supply part of UI bus converter 6DS4400-8AB.

Only the exact configuration shown above is represented. Adjacent model variants, optional assemblies and system accessories are not treated as part of this ordering identity.

Function, operating principle and application

The notes below explain how this product is used and how its documented signal, power or control path operates. They remain limited to the manufacturer evidence for this model.

Function

The module supplies the internal power required by the documented TELEPERM UI bus converter assembly.

Operating principle

It conditions the incoming supply and distributes regulated power to the converter electronics through the parent assembly connections.

Application

It is a service part for the 6DS4400-8AB bus-converter unit used in legacy Siemens process-control systems.

Replacement boundary

Confirm parent converter identity, supply wiring, connector position and module revision before installation.
