

3BHB005245R0101

ABB KU C755 AE GUSP Subboard

Verified identification

Manufacturer	ABB
Exact order number	3BHB005245R0101
Recorded board designation	KU C755 AE
Recorded assembly context	GUSP subboard

Function and role

This identification document keeps the ABB order number, KU C755 AE designation, and GUSP subboard context together so that procurement does not split or merge the identifiers incorrectly.

Working principle

A replacement should be compared using the complete label, coating or assembly variant, connector population, mounting geometry, and parent assembly documentation.

Application

The sheet supports installed-base verification and sourcing of the exact ABB board without assigning undocumented electrical ratings.

Selection and replacement note

Do not treat another KU C755 or GUSP-labelled board as interchangeable unless ABB documentation or a qualified system engineer confirms the complete configuration.

Manufacturer-source basis

No exact public ABB technical document was located for the complete 3BHB005245R0101 code. The sheet is therefore restricted to the current exact identity and controlled matching steps.
