

# 3BHE006373R0101 XVC769 AE101

ABB Optical Electrical Interface Board

## Verified identification

| Manufacturer         | ABB                                      |
|----------------------|------------------------------------------|
| ABB material number  | 3BHE006373R0101                          |
| Official description | Optical Electrical Interface (OEI) Board |
| Spare-parts item     | 2.16                                     |
| Cabinet quantity     | 1                                        |

## Function and role

ABB identifies 3BHE006373R0101 as the Optical Electrical Interface board in the ACS2000 spare-parts structure. The manual lists the board within the IFU filter assembly and assigns one unit per cabinet.

## Working principle

The board occupies a defined optical/electrical interface position inside the drive assembly. Service work must preserve the documented board location, optical connections, electrical connectors, and cabinet safety procedure.

## Application

The part is used for ACS2000 installed-base maintenance where the exact OEI spare identified by ABB item 2.16 is required.

## Selection and replacement note

The additional XVC769 AE101 marking is retained from the existing record, but replacement approval must be based on 3BHE006373R0101 and the cabinet documentation.

## Manufacturer-source basis

ABB ACS2000 Spare Part Manual 2UEB000131, item 2.16.
